Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 24 March 2003 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 85-106 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter that was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

4. As presently worded, the method of claims 85-106 encompass the use of oligonucleotide molecules that are "at least about 10 nucleotides in length." A review of the original disclosure failed to locate support for this range. Support for a range of from "about 10 to about 20 nucleotides" has been found, e.g., page 10 and original claim 5. Such a limitation has been

interpreted as encompassing a range that is without an upper limit. Such an interpretation is based on the continued usage of the phrase "at least." While the claims have been amended so to reflect a lower endpoint for the range *i.e.*, "about 10," no limitation exists with regard to the upper limit of the range. As noted in the final Office action of 23 July 2002, the specification has not been found to provide support for such an open-ended range, and accordingly, constitutes new matter. While applicant acknowledges the prior rejection over the same issue, and indicates that the claims, as amended, render the rejection moot (page 13 of the response of 23 December 2002, the response does not indicate where support for the open-ended range is to be found in the specification. Accordingly, and in the absence of convincing evidence to the contrary, the limitation added constitutes new matter in that it is not supported by the originally-filed disclosure and as such, claims 85-106 are rejected under 35 USC 112, first paragraph.

5. The method of claim 101 requires one to perform hybridization reactions between a probe of undefined sequence to a target sequence found in any of a variety of "sugar pathway genes." A review of the disclosure fails to find an adequate written description of the coding sequence for these genes as found in any of the encompassed microorganisms, much less an adequate written description of the probes and primers that would be used in the hybridization and detection aspects of the method.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1634

7. Claim 101 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
8. Claim 101 is indefinite with respect to which genes are considered to constitute "sugar pathway genes."

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley L. Sisson whose telephone number is 703-308-3978. The examiner can normally be reached on Monday through Thursday from 6:30 AM to 5 PM.
10. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gary Benzion can be reached on 703-308-1119. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9306 for regular communications and 703-872-9307 for After Final communications.
11. Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1234.
